

Restoring the Living Area Label

Reference Number: **KB-00285**

Last Modified: **July 14, 2025**

QUESTION

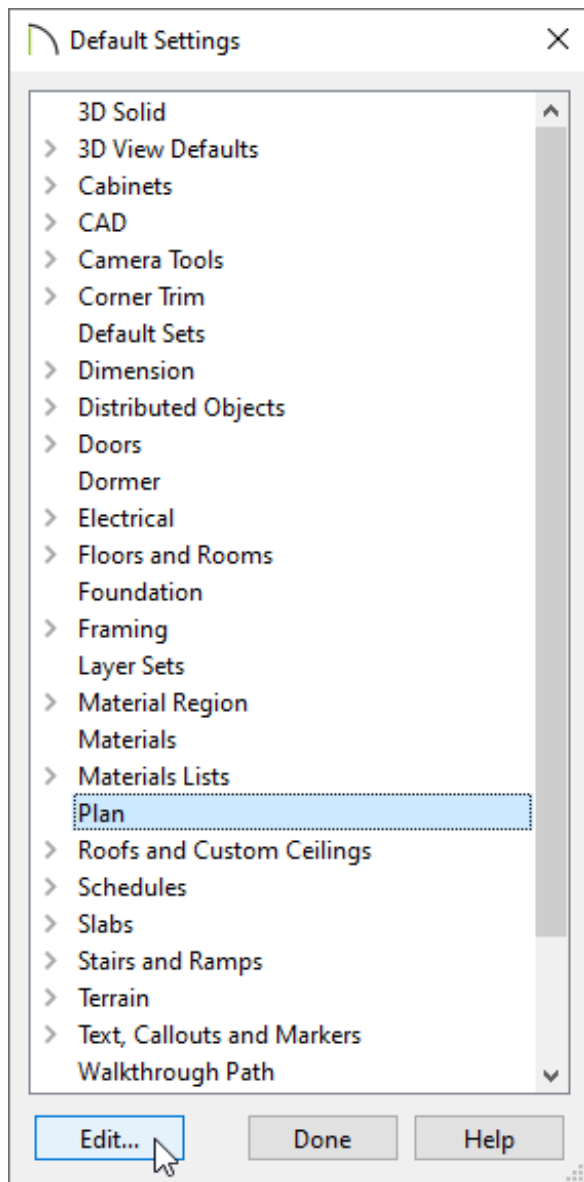

The label that displays my Living Area has disappeared. How can I restore its display?

ANSWER

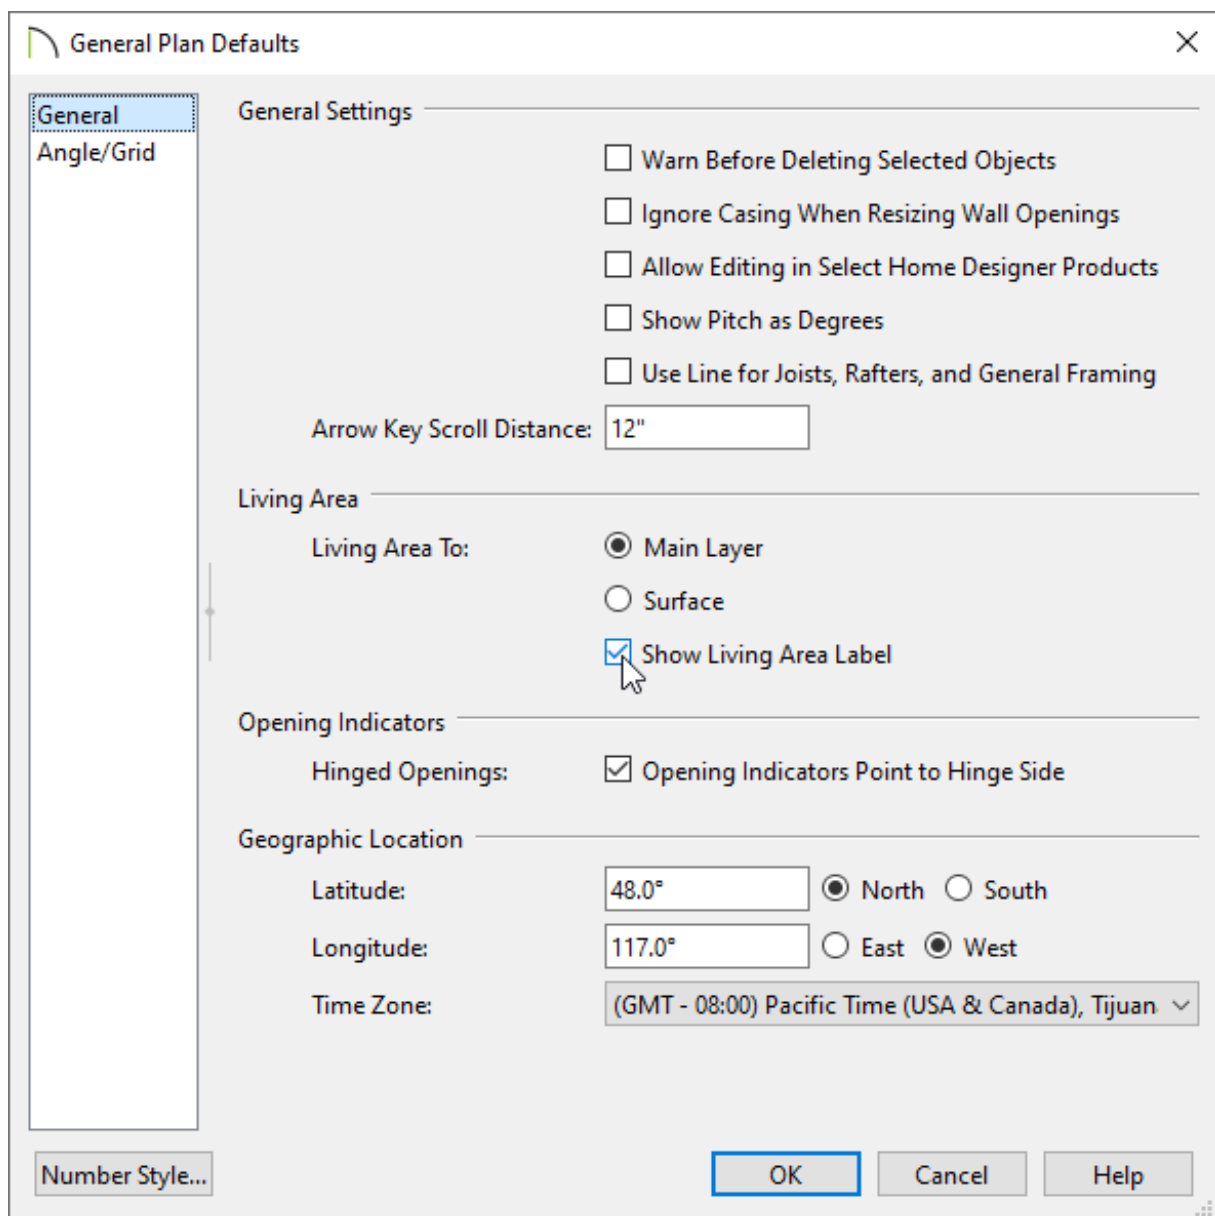

If the Living Area label has disappeared or was deleted, it can be regenerated by accessing the General Plan Defaults or by performing a Plan Check.

To display the Living Area label

1. Select **Edit> Default Settings**  from the menu.
2. In the **Default Settings** dialog, select **Plan** from the list, then click **Edit**.

3. In the **General Plan Defaults** dialog that displays, place a check in the **Show Living Area Label** box.

4. Click **OK** and **Done** to confirm the changes and close the dialogs.

If the Living Area label still does not display after enabling the setting above, try the following:

- **Open**  one of your rooms up to specification and verify that either the **Include in Total Living Area Calculation** option or **Use Default (Included)** option is selected on the **GENERAL** panel. If all rooms on a floor level are set to be excluded in the total living area calculation, the Living Area label will not display.
- Select **Tools> Checks> Plan Check**  from the menu. In the **Plan Check** dialog, click the **Done** button. When the dialog closes, check to see if the Living Area label displays.

- Next, ensure that the "Room Labels" layer is displayed in the **Layer Display Options**  dialog. This is the default layer for the Living Area label. You will also want to make sure that the Text Style assigned to this layer has a Character Height value large enough to be visible in the floor plan.
- If the Living Area label still doesn't appear, click on an exterior wall within a floor plan view, and use one of the resize edit handles at either end of the wall to detach it from one of the other exterior walls that it's connected to. By opening the enclosed room area, the living area calculation will be forced to update. Navigate to **Build> Floor> Rebuild Walls/Floors/Ceilings** . Reconnect the walls to restore the enclosed room area, then navigate to **Build> Floor> Rebuild Walls/Floors/Ceilings**  once again.
- You can use one of the **Text**  tools to place a text object, then insert the Living Area (%living.area%) macro.

If you continue to have trouble with populating the Living Area label, please send a copy of the .plan file to our Technical Support department using the [Technical Support Center](https://www.chiefarchitect.com/support/article/KB-00717/using-the-technical-support-center.html) (<https://www.chiefarchitect.com/support/article/KB-00717/using-the-technical-support-center.html>).
