## QUESTION

I would like to create a wrapped opening, or doorway, in my plan. How can I accomplish this task?

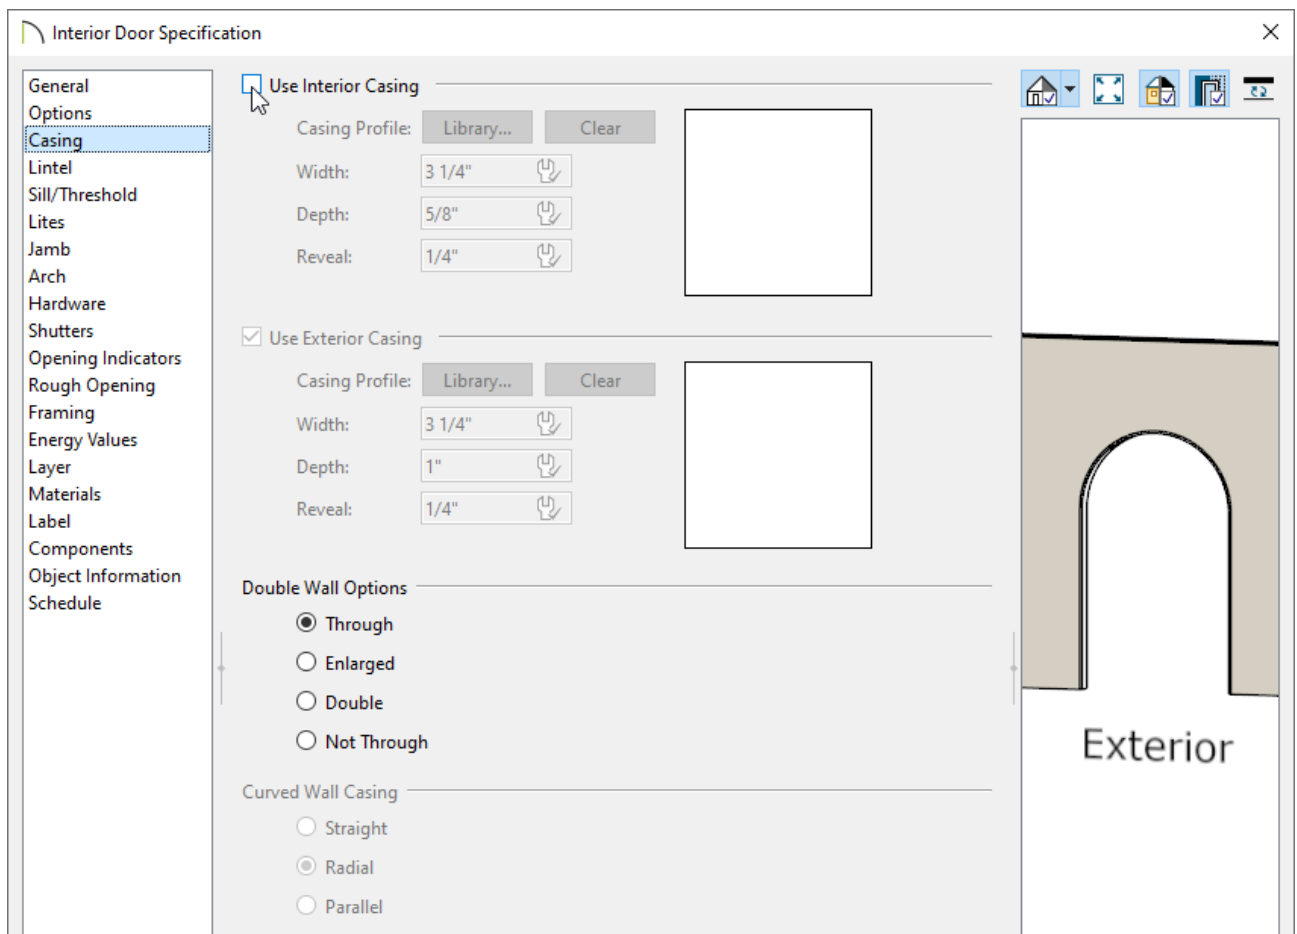

# ANSWER

You can create a wrapped opening by placing a doorway and removing the casing and jamb.

## To modify a doorway

1. Select **Build > Door > Doorway**  and click in the wall in which you want to place it.
2. Once placed, use the **Select Objects**  tool to select the doorway, then click on the **Open Object**  edit button.
3. In the **Interior Door Specification** dialog that opens:

- On the **CASING** panel, remove the check next to the **Use Interior Casing** box.

- On the JAMB panel, remove the check next to the **Has Jamb** box.
  - Click **OK**.
4. If room molding is specified on either side of the doorway, create a **Camera**  view to notice that the molding wraps around the doorway opening.

Wrapped openings can also be created using the Pass-Through tool. However, since pass-throughs are classified as windows, the interior casing, frame, and lintel will need to be removed to create a similar effect.
