### QUESTION

I have moved my Library Browser, Project Browser, Active Layer Display Options, and/or Tool Palette onto a secondary monitor which is no longer there or otherwise cannot locate it when I go to activate this tool. How can I reset it to its default position within Chief Architect?

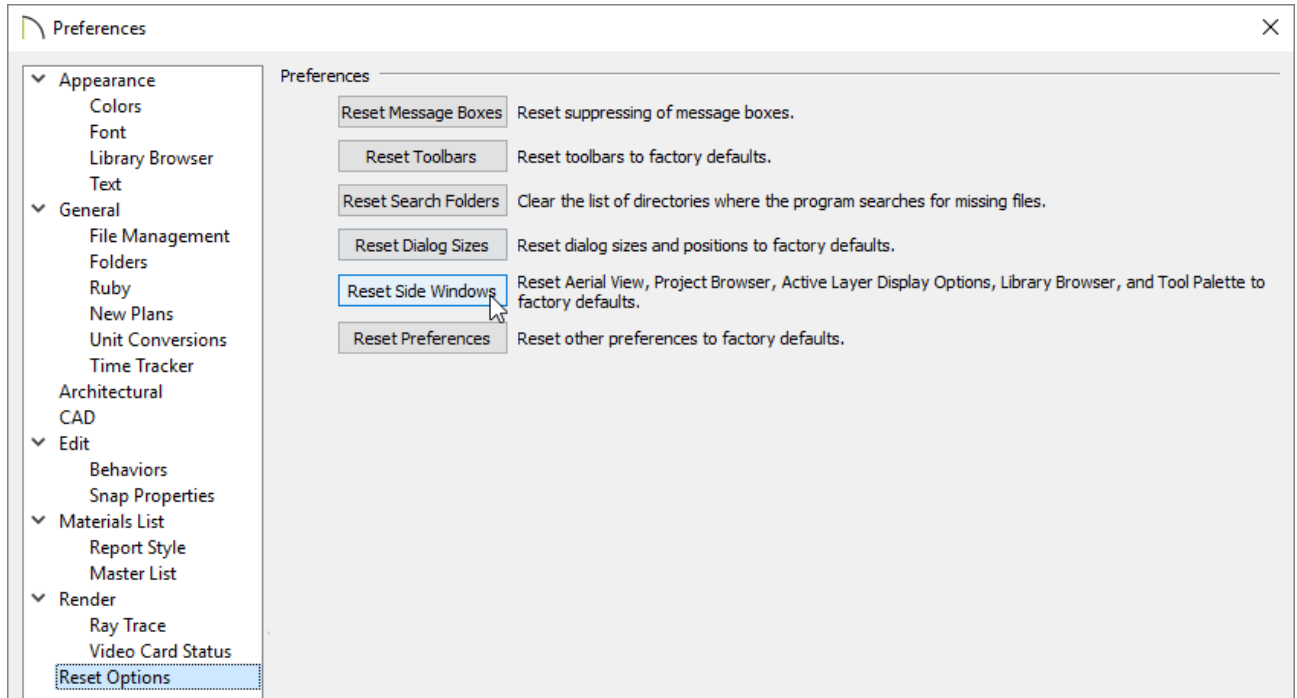

### ANSWER

Restoring the size and position of any of these side windows in Chief Architect is easy using Reset Options within Preferences.

To restore the Side Windows

1. Launch Chief Architect and either **Open**  an existing plan, or start a **New Plan** 

2. Select **Edit > Preferences**  from the menu if you're on a Windows PC or **Chief Architect > Preferences**  if you're on a Mac.
3. On the **RESET OPTIONS** panel, select the **Reset Side Windows** button.

4. You will be prompted with a warning that states, "All side windows will be reset to the default size and position when you re-launch the program." Click **OK**.
5. Click **OK** again to close the dialog.
6. Save your work, re-launch the Chief Architect software, and notice that the size and position of all of your side windows have been restored.
